## **energydots™ sponsors Bennetts British Superbike rider Ryan Vickers in his debut season**

### **energydots™ becomes Official EMF Protection Partner for Ryan Vickers**

2018 National Superstock 600 champion, Ryan Vickers, makes a historic leap to Bennetts British Superbike Championship in 2019 with the RAF Regular & Reserve Kawasaki.

Backed by his Official EMF Protection Partner, energydots™, Ryan will be using a range of energydots™ products to reduce his EMF exposure and improve energy and performance levels - both on and off the track.

In our digital era, we are constantly surrounded by wireless radiation, otherwise known as Electro Magnetic Fields (EMFs), emitted from our mobile phones, laptops, gaming devices, fitness trackers, smartwatches and more. But EMFs are invisible to the naked eye, and not everybody knows that they may be damaging to our health.

More and more people are facing challenges surrounding EMFs, experiencing unaccountable headaches, fatigue, inability to concentrate and anxiety. The energydots™ range of self-adhesive DOTS is a precautionary measure from the unknown health effects of wireless radiation, programmed to harmonise man-made electromagnetic emissions.

A range of independent tests indicate how energydots™ helps to reduce unnatural thermal heating of the body, as well as improve oxygenation of red blood cells. Customers have also reported improved sleep, mood, concentration and overall energy.

After trialling the products, including a smartDOT on his phone and a bioBAND on his wrist, Ryan Vickers commented "In just a few months, energydots have helped me to sleep better and feel more alert, which can make the difference between winning and losing."

For more information and to learn about the benefits of the full line of energydots™ products, please visit <http://energydots.com/>
